5 How we use the data

5.1 *The purposes of, and basis for, personal data processing*

The principal purposes of personal data processing are client administration, invoicing and compliance with the obligations assumed by Pareto for the execution of assignments for, and performance of agreements with, clients. The basis for personal data processing is statutory obligations, as well as such processing being necessary for the performance of an agreement with, or the provision of a service to, clients. We will otherwise process personal data to the extent it is required or permitted under applicable legislation, or to the extent the client has consented to such processing.

Apart from this, personal data are processed for, *inter alia*, the following purposes:

- Control actions and documentation (Section 5.2)
- Disputes (Section 5.3)
- Requests from authorities (Section 5.4)
- TRS reporting and stock exchange reporting (Section 5.5)
- Client follow-up, advice, marketing, and product analysis (Sections 5.6 and 5.7)
- Client service development (Section 5.8)
- Social media pages (Section 5.9)
- Video conferencing (Section 5.10)

5.2 *Documentation and control actions*

The securities legislation and anti-money laundering legislation require Pareto to process and keep information, cf. Section 3. In addition, the authorities require investment firms to carry out comprehensive checks to ensure that their own business operations are conducted in compliance with applicable statutory requirements. This requirement means that we need to review stored dialogues with our clients, whether by e-mail, telephone, MS-Teams meetings (only audio), chat, etc.

We will be able to identify relevant telephone communications by searches for incoming or outgoing telephone numbers, time of call and/or which employees participated in the call. We will be able to identify communications conducted via other communication channels based on client identity, time of dialogue and which employees participated in the dialogue.

We are required to report any suspicious transactions to the authorities and will in such situations hand over related client details and client dialogues.

5.3 *Disputes*

In the event of disputes between us and clients, potential clients, suppliers, or business partners, it will be necessary for us to review stored client dialogue to determine the course of events.

The dialogue with the client, potential client, supplier, or business partner may be invoked as evidence in connection with proceedings before administrative appeal bodies or the courts of law.

5.4 Requests from the authorities

Pareto receives requests from financial regulatory authorities, tax authorities and the police/public prosecutors ordering us to disclose, pursuant to statute, client relationship documentation. Pareto will in such contexts be required to disclose stored personal data in the form of client details and client dialogue.

5.5 TRS reporting and stock exchange reporting

The securities legislation requires Pareto to report all trades to relevant Financial Supervisory Authority (TRS reporting) and applicable Stock Exchanges (order record keeping). The details shall identify the client and the decision maker.

5.6 Advice, sales, and client follow-up

The data that the securities legislation requires Pareto to collect and keep in relation to clients are used as a basis for providing clients with advice that is tailored to their level of expertise, as well as their risk appetite and investment objectives. Such data are also used to ensure that clients do not trade in securities of which they have insufficient knowledge. Pareto also uses personal data for client follow-up.

5.7 Marketing, product, and client analysis

Pareto uses personal data to provide you with information on services and products that may be of interest to you. Personal data is processed in the context of marketing, product- and client analysis. This processing forms the basis for marketing, process- business- and system development. This is to improve our product range and optimize our client offerings, which may also involve profiling. We have a legitimate interest to send our clients information on similar services and products from the Pareto Securities Group that may be of interest to them, to use profiling for example when conducting client analysis for marketing purposes or monitoring transactions to detect frauds. Information on services and products to potential clients are based on consent.

You may during the establishment of the client relationship or subsequent thereto have consented to receiving electronic communications from us. Pareto will in such case send you communications based on the consent you gave at the time.

Besides, Pareto uses telephone, e-mail, SMS, MS-Teams, and other digital channels of communication in its client marketing. Such marketing takes place in compliance with the legislation applicable at any given time. If you do not wish to receive such communications, you may decline such communications at any given time.

5.8 Client service development

We store data on the use of our client services to improve the client experience and enhance our services based on knowledge about statistics and trends in the use of said services. Such storage also facilitates fault detection.

5.9 Social media pages

To give you relevant information and communicating with you, we have established publicly accessible profiles and pages on Facebook, LinkedIn, Twitter, Instagram, and YouTube.

As administrators of our pages on the social media platforms, we are joint controllers with the relevant social media provider for processing of the data generated through such pages. For further information, we refer to the privacy policy of the relevant social media provider.

We are given access to aggregated data about visits to and activities on our pages. We use this for the purpose of statistics and analysis. This is not personal data to us, as we cannot link the aggregated data to individuals. We do not store this information ourselves but have access to it if we have our social media pages. You may at any time delete information about yourself, e.g., by removing contents our reactions you have posted. Please note that your posts are not deleted just by you unfollowing our pages.

5.10 Video conferencing and Pareto TV

When Pareto arranges video conferences, e.g., when organizing meetings, seminars, and roadshows, we may from time to time make video recordings of them. If so, you will be notified in advance of our processing of personal data in connection with the relevant conference.

We also make video recordings for our concept, Pareto TV. You will be notified in advance of the processing of your personal data.
